

It has come to my attention that a radio station my family and I enjoy listening to in the Denver area is in danger of being pulled from the air due to something called an LPFM in place of the typical translator. Though I do not pretend to know exactly what all that means if there is a chance that KLOVE radio would leave our area that would be dissappointing to myself and the many others in this area who listen to the radio station. Besides the many people I know, there are a multitude of cars seen on the road everyday proudly sporting the KLOVE Radio bumper sticker. This radio station plays a big role in the lives of many people. Having a station on dial that my kids, wife, and I can enjoy together is something I didn't have the chance to grow up with myself. The Christian content and clean format brings our generations together in a way traditional music usually cannot. I, along with many others ask that Klove be unaffected in its broadcast in my region as well as the many other regions throughout the nation. Thank You.
